& Legionella

**Keeping you safe and
compliant.**

About Scientific Services

Managing Asbestos & Legionella

Scientific Services is an experienced team of specialists. Supported by our Managing Director Dr Tim Hamilton, we are committed to keeping you safe and compliant by effectively managing your environmental risks.

We deliver trusted asbestos surveys, sampling and testing services. Our multi-disciplined, experienced team also project manage asbestos removal works and provide Legionella risk assessments. Together, we ensure safe and efficient practices on sites throughout the South West.

We are independent, working with you, for you.

Let our testing, management and consultancy services take the stress, hassle and worry out of your projects.

About Us

Established in 2002, Scientific Services has evolved in to one of the most trusted and experienced asbestos and Legionella consultancies within the South West.

We are completely independent, with no shared directorships in asbestos removal or Legionella bacteria treatment companies.

Our customers have peace of mind, that we have no vested interest in securing a particular contract. We will always recommend the best solution for meeting their needs.

We have a policy of directly employing all employees. We invest heavily in their training and development. Their knowledge and experience are valued. It's what enables us to provide the services and expert advice that our clients need.

Our Accreditations

Professionalism and experience is at the heart of everything that we do. This ethos and our team's hard work has secured our accreditations.

2577

6174

Our asbestos sampling, surveying and testing services are UKAS accredited to ISO/IEC 17020: 2012 and ISO/IEC 17025: 2017. Our other services are accredited to ISO: 9001.

Our accreditations demonstrate our technical competence, impartiality and consistency. Assuring you that we will deliver a quality service.

Asbestos Services

Whatever your asbestos problem, we can help. Our experienced team can provide your complete asbestos solution.

Asbestos Surveys

Management Surveys | Refurbishment & Demolition Surveys | Reinspection Surveys

The first step in safeguarding yourself, your occupants and your tradespeople.

Our UKAS accredited asbestos surveys are tailored so that they meet your exact needs. Your survey report will be easy to understand, pinpoint your asbestos risks and confirm your next steps.

Knowledgeable Surveyors

The first step in safeguarding yourself, your occupants and your tradespeople.

Our UKAS accredited asbestos surveys are tailored so that they meet your exact needs. Your survey report will be easy to understand, pinpoint your asbestos risks and confirm your next steps.

Quality Reports

Easy to understand, pinpoints the risk and provides helpful advice on what to do next. Emailed and stored on our asbestos portal for you to access.

Fast Turnaround

Our in-house UKAS approved laboratory means we can test and report on samples quickly for our surveyors.

On-hand to Help

After your survey, our experts are on-hand to discuss your survey, clarify any points and support you with what to do next.

Asbestos Testing

Our UKAS accredited asbestos testing services will confirm the presence or absence of asbestos at your site. The results will inform your asbestos management and removal projects, whilst promoting safety and Legal compliance.

Sample analysis is undertaken using high quality, calibrated equipment. Our analysts use stereomicroscopy, polarised light microscopy and dispersion staining. These techniques are best practice and HSG 248 compliant. They are the industry standard. Together they ensure that we provide consistent, accurate results, you can trust.

Accurate Results

We consistently provide reliable results. Our laboratory has held the top score for over a decade on AIMS. This external proficiency scheme tests our performance.

Experienced Analysts

Our team includes multi-trained individuals who have over thirty years experience. Together they accurately analyse the most obscure samples.

Fast Turnarounds

We can provide sample results on the day of sample receipt and if needed within the hour. Our testing won't delay your projects.

Advice & Guidance

After issuing your results, our team are available to chat through what they mean and their implications. They provide best practice advice about what to do next.

Asbestos Removal

Our experienced team of consultants will manage your removal project. They will ensure your safety and guarantee you meet your legal responsibilities.

Project Managed

We take care of everything. From initial appointment of contractors through to final handover. Our team deliver against agreed objectives, budgets and timescales.

Experienced Consultants

Our MD, Dr Tim Hamilton is CoCa qualified and oversees all removals projects. His experience ensures that project plans are realistic, legally compliant and safe.

Unbiased Assessment

We will be working for you; ensuring that your contractors complete the removal to the highest possible standard.

Supervising Removals

Our P403 and P404 qualified consultants will promote best practice working methods. They will identify and resolve any safety or legal issues before they become a problem.

Asbestos Air Testing

Reassurance Air Test | Four Stage Clearance | Visual Inspections | Personal Monitoring

Our consultants test air quality and assess your removal projects. Protecting you, your occupants and your trades people, we will ensure your compliance with the law. We provide 24/7 coverage and have a fleet of mobile laboratories located throughout the South West.

Accurate Results

We deliver consistent, accurate results. Our laboratory has held the top score for over a decade on RICE. An external proficiency scheme that tests our performance.

Experienced Analysts

BOHS P403 & P404 qualified, with experience of working on a range of domestic, commercial and industrial sites. We match individual's expertise to your sites and needs.

Immediate Results

Clear, easy to understand reports are issued on site, within minutes of test completion. They confirm full test results and state whether an area is safe to reoccupy.

24/7 Coverage

You never know when an asbestos incident might occur. Our air testing services run day and night, so we can be with you when you need us.

Asbestos Awareness Training

Our courses educate employees and are your first step towards understanding asbestos and its risks. We provide courses throughout Cornwall and Devon at venues to suit your needs. On completion all candidates are issued with a certificate of training.

Educates & Protects

Educating contractors so that they don't disturb asbestos. Ensuring that if they do, they know what to do next.

ISO: 9001 Accredited

Our course is ISO: 9001 accredited and meets the syllabus requirements of UKATA and regulation 10.

Asbestos Experts

Scientific Services' team are asbestos experts. Your course will be informative and full of real life content and examples.

Venues Near You

We understand that travelling to training increases costs, so we bring the training to you.

Legionella Services

We are your one stop shop for Legionella. We deliver everything from risk assessments to bacteria removal.

Legionella Risk Assessments

Your gateway to reducing Legionella risks. Protecting you, your employees and your clients, our risk assessments are your first step to legal compliance.

Experienced Consultants

Our consultants are BOHS qualified and suitably experienced to complete your risk assessment. Supported by our MD, Dr Tim Hamilton, they will ensure that all risks are identified.

Quality Reports

Detailed, with an easily understood summary that lists all risks and recommendations. Our documentation makes your next steps clear.

Portal Access

An interactive system that contains everything needed for a HSE inspection. It also highlights anything that is out of spec. Our portal ensures you're prepared.

On-going Support

Once we have completed your risk assessment, we can train you in managing your Legionella risks. We're always on hand to answer your questions and can attend site when you need us.

Legionella Monitoring

Our water sampling and testing services will monitor your water systems to prevent Legionella risks. Our team will devise a Legionella management plan that is tailored to your individual site; we will ensure safety and compliance.

Knowledgeable Consultants

We will collect quality samples and assess your results. If your samples return problem readings and counts, we will flag this up. You can be assured of safe systems.

Accurate Results

Your test reports are provided by established UKAS accredited laboratories. Fast, accurate results mean issues are identified quickly; before they become a problem.

Customer Portal

Our portal logs all data in an easily understood format. In the event of a HSE inspection, your documentation and records are up to date and complete.

Advice & Support

Results can be confusing and are meaningless unless you know how to improve bacteria levels. Our team recommend how best to manage any issues at your site.

Legionella Remediation

Resolving Legionella bacteria problems within your water systems. We deliver bespoke, tailored remediation programmes that will suit your site's individual requirements.

Experienced Consultants

Our Consultants are P901 qualified and are experts in managing Legionella bacteria risks. Coupled with our MD's PhD in Microbiology this means we give dependable advice.

Project Managed

We ensure the safe removal of Legionella bacteria from your water systems. We manage clear time frames for your project's completion and test to ensure results are delivered.

Fast Response

We have mobile laboratories and certified practitioners throughout Cornwall, Devon, Somerset and Dorset. This enables us to get to your site quickly in the event of a Legionella bacteria issue.

Portal Access

This system will record details of your remediation works. It provides you with complete data sets that in the event of an inspection, will satisfy the HSE.

Other Services

Our expertise and experience enable us to provide a range of additional services.

Lead Testing

Confirming presence of lead in paint and air. Enabling you to manage exposure levels. Safeguarding you and your tradespeople.

Anthrax Testing

Identifying *Bacillus anthracis* in your samples. Enabling you to put in place control measures. Protecting you and your tradespeople.

Expert Witness

Providing independent opinions based on factual evidence. Our expert witness services inform the judgement decision in your civil and criminal cases.

Laboratory Auditing

An independent analysis of your capabilities. We evaluate your laboratory's systems and methods. Our audits create efficiencies, secure contracts and achieve accreditations.
