

Opportunity for Asbestos Surveyors and/or Analysts in the South West

Asbestos Consultant

Our independent, UKAS accredited asbestos consultancy continues to grow and secure greater market share throughout the South West. To enable us to deliver our asbestos surveying and testing services to our ever expanding client base, we require candidates to fulfil the role of an Asbestos Surveyor & Analyst.

The successful candidates will be located throughout the South West, primarily operating throughout Cornwall, Devon and Somerset, but also covering the surrounding areas.

Your main duties will include delivering high quality, accurate asbestos surveys. Our sites include a range of iconic commercial sites through to domestic properties. The work is varied and a desire to work in a fast paced, responsive environment is essential. We have a strong focus on integrity, impartiality and independence. You will support this ethos and assist in maintaining this position by working within our consultancy's detailed policies and procedures. We have a focus on long-term client relationships. On-going support and advice are core to our successful business model.

You will be P402 qualified (or equivalent) and will ideally have a minimum of 2 years' experience in an asbestos surveyor role. Ideally, you will also be P401 qualified (or equivalent). You will be able to work effectively as part of a team or independently, have excellent attention to detail and a full, U.K. driving licence.

Main duties will include:

- Completing asbestos sampling and undertaking management, refurbishment, demolition and re-inspection surveys to domestic, commercial and industrial sites.
- Undertaking asbestos analysis on bulk samples as required using Polarised Light Microscopy and dispersion staining.
- Quality checking and booking in samples received by the laboratory.
- Produce asbestos survey and bulk analyst reports using the company's software.
- Utilising TEAMS asbestos database software to collate, record and report asbestos sampling and survey work.
- Carrying out on-site risk-assessments.
- Liaising with Clients and Contractors.
- Working within company health and safety policies and procedures.
- Complying with all relevant asbestos regulations and working to UKAS, HSG 264 and HSG 248 requirements.
- Maintaining good housekeeping of your workstation/equipment. Whilst ensuring that all calibrations, inspections and maintenance of all equipment within your workstation and surveying kit is up-to-date.
- Completing IQC, MQC and AIMS as requested.
- Ensuring safe waste storage and disposal from your work.

We are looking for candidates who have:

- BOHS P402 qualification (or equivalent) is essential.
- BOHS P401, P403 & P404 qualifications (or equivalent) would be desirable.
- 1 years' minimum experience of working in a similar role.
- Excellent written and verbal communication skills.

- Experience of TEAMS, Microsoft Teams and Microsoft Office would also be advantageous.
- Ability to work under pressure.
- Full UK driving licence.

Working pattern:

- 40 hours per week. At times over-time will be required to cover out of hours' work (nights and weekends) and to cover jobs during busy periods.

Annual Leave:

- 20 Days plus bank holidays, with ?? additional days per year worked for the company (capped at 25 days).

Salary:

- £25,000 - £35,000 depending upon previous experience and knowledge.

Benefits:

- Opportunities to work from home
- Additional leave
- Free parking
- Death in service insurance

The successful candidate will be provided with a company vehicle to travel to sites and the company office as needed.

Scientific Services is an equal opportunities employer who welcomes applications from all suitably qualified individuals.
